

## Sherzod Saidmaksumov

### Web Developer

St. Petersburg, FL 33701 | +1 (332) 270 - 2902 | [sherzod.saidmaksumov@gmail.com](mailto:sherzod.saidmaksumov@gmail.com) | [LinkedIn Portfolio](#)

#### Professional Summary:

Web Developer with more than 6 years of experience in developing websites. Skilled in HTML, CSS, JavaScript, Python, and PHP, successfully managed the entire web development process, from conceptualization to launch. My expertise includes WordPress theme and plugin development, WooCommerce for e-commerce solutions, and writing custom scripts for automation.

#### Skills:

**Programming languages:** Python, PHP, Javascript

**Frontend:** HTML & CSS, Bootstrap, Tailwind, Sass, Gulp, jQuery, Next.js

**Backend Frameworks:** Django, Laravel, Flask, FastAPI

**CMS:** Wordpress, Joomla, Contao

**SQL:** PostgreSQL, MySQL

**OS:** Windows, Linux, macOS

**Server management:** Nginx, Apache

**Design:** Figma, Adobe Photoshop

**Other:** SEO, Docker, git, github, Rest API

#### Professional Experience:

**Web Developer** | [Blackmore Music Group](#) | 11/2018 - 12/2023

- Designed and developed more than 15 websites from scratch using HTML, CSS, Javascript and Wordpress
- Developed a comprehensive student portal on WordPress for the music community, incorporating a custom-designed student dashboard with extensive functionality. This included features for applying to musician vacancies, participating in contests and masterclasses by uploading compositions, and creating personal pages.
- Led website optimizations, focusing on content and SEO enhancements that directly boosted search rankings and user engagement. Achieved significant traffic increases through strategic SEO improvements and technical upgrades, resulting in elevated Pagespeed scores and enhanced user experiences.

**HTML & CSS Developer** | [CreativeMade](#) | 03/2017 - 10/2018

- Excellently converted designs of any complexity into fully functional websites using HTML, CSS, and JavaScript, showcasing the ability to rapidly learn and apply new skills to overcome technical challenges.
- Significantly enhanced website performance and loading speed through code optimization, contributing to improved SEO rankings and pagespeed scores.
- Diligently corrected legacy code issues, ensuring all web pages were error-free, cross-browser compatible, and fully responsive, leading to a more seamless user experience across devices.
